## **Arts & Crafts :**

### **Jade Factory ( BEIJING )**

Jade articles produced in ancient China were used in sacrificial ceremonies, rituals and adornments. With their solid and smooth quality, and lustrous colors, jade products have always been famous for their beauty and style.

In ancient time, jade was only used for personal ornaments. After the middle and later Neolithic age, large jade articles replaced small ones. Large jade article usually symbolizing a certain prestige began to reflect the ideas of social class system and ancient religions.

In the book of Rites, jade is described as “mild, smooth and lustrous like the virtue of a kind and decent man. It is cut with angles and corners, but will not hurt anyone, like the virtue of a righteous man. A jade ornament worn as a pendant is like benign, modest man of good manners. When it is struck, it gives a clear, resonant and lingering sound which lasts till it comes to a sudden stop, just like the attitude of a man of virtue toward music. The beauty of a piece of jade co-exists with its flaws which are not covered up, like the behavior of a loyal and honest man. It is crystalline and transparent and shiny, like the quality of purity which springs from the bottom of a good man’s heart.” So the art of jade carving and traditional is most representative respect of Chinese culture, it is subtle to detail, deeply involved in craftsmanship and natural beauty, which shows a unique form of the glorious Chinese civilization.

### **Pearl ( BEIJING )**

As early as 4000 years ago, Chinese people discovered a kind of delicate gem with soft brilliance when searching ocean for food. This is pearl. Since then, countless pearl jewelry and artwork have been created by talented Chinese people. Hence, pearl has been one of the important parts of Chinese culture. The first book note of pearl is four thousand years ago in China. And people in China have been collecting, growing, and harvesting pearls for over two thousand years - we have the oldest pearl production tradition anywhere in the world. China was also the first country to develop cultured pearls, around 1082 A.D. The country is huge, with diverse waterways that provide many different environments for oysters providing kinds of freshwater pearls and salted-water pearls. Pearls have been harvested and cultivated primarily for use in jewelry, but in the past they were also stitched onto lavish clothing. Pearls have also been crushed and used in cosmetics, medicines, and in paint formulations. Generally, saltwater pearls are higher in quality than freshwater pearls. They often have a smooth, round, regular shape—freshwater pearls tend to be more irregular. Saltwater pearls have a glossy surface with moderate luster. Their color is most often white or light. Because a saltwater oyster can produce only one pearl, while a freshwater mollusk can produce several at once, saltwater pearls are more rare than freshwater—and thus more expensive.
